EDUCATION

California Polytechnic State University – San Luis Obispo — Expected Graduation: June 2029
Bachelor of Science in Industrial Engineering

- **Relevant Coursework**: Intro to Design & Manufacturing, Process Improvement Fundamentals, Financial Decision Making for Engineers, Materials Engineering

PROFESSIONAL EXPERIENCE

Fast Lane Precision | Manufacturing Engineering Technician — July 2026 - August 2026

- Machined precision aerospace components from materials such as Inconel and A286 stainless steel
- Supported production of hardware for customers such as SpaceX, Relativity Space, Avibank, and Hartwell
- Perform First Article Inspection Reports (FAIR) in order to verify compliance with customer specifications
- Utilized MasterCam to generate optimal CNC toolpaths for 3-axis and 5-axis Haas and Kitamura mills
- Applied Design For Manufacturing (DFM) principles by adapting customer CAD models in order to incorporate manufacturable features, dovetails, and other workholding geometry
- Verify tooling, fixturing, and machining setups in order to ensure efficient and repeatable manufacturing processes

Dokken Engineering | Preceptee — May 2024 - August 2024

- Conducted biological field surveys and applied environmental impact assessment principles to active engineering projects
- Assisted in the evaluation of bridge structures, comparing structural types, materials, constructability, and aesthetic integration
- Reviewed plats, title reports, appraisals, and eminent domain documentation to understand land acquisition processes
- Supported design discussions related to bikeway master plans, including safety, traffic flow, and user ergonomics
- Gained exposure to permitting processes and coordination between engineering and environmental teams
- Gained exposure to mapping software such as ArcGIS and AutoCAD

PROJECT EXPERIENCE

Northrop Grumman Collaboration Project | Manufacturing Team Member — November 2026 - Present

- Fabricated composite layups and molds for fuselage and wing structures of a VTOL fixed-wing paramedic aircraft in collaboration with Northrop Grumman
- Performed precision composite layups with carbon fiber and Kevlar, ensuring correct orientation and vacuum bagging procedures
- Prepared and finished molds while conducting dimensional verification to maintain industry-level tolerances
- Conducted quality inspections, including defect identification (voids, delamination) and first article inspection
- Collaborated with design and manufacturing subteams to reconcile engineering drawings with fabrication constraints
- Redesigned and optimized 2nd-iteration of the payload deployment system, improving manufacturability, efficiency, and integration with the aircraft structure

Trail Mix Production Project - Cal Poly Food Pantry — August 2025 - December 2025

- Developed Standard Operating Procedures (SOPs) to ensure consistent product quality
- Designed production layout and performed capacity analysis to determine workstation needs
- Planned and tracked project schedule and budget to meet production targets
- Coordinated material sourcing and defined inventory and storage processes
- Applied ergonomics, safety, and FDA requirements to workstation design and quality processes

SMUD Solar Regatta Competition - Solar-Powered Boat Design & Manufacturing Project — January 2025 - May 2025

- Designed and manufactured a fully solar-powered boat for the SMUD Solar Regatta competition, operating exclusively on photovoltaic energy
- Integrated solar panels, charge controller, battery system, and electric motor to create an efficient propulsion system
- Contributed to hull design and structural assembly, optimizing hull for reduced drag, buoyancy, and weight efficiency
- Calculated power-to-weight ratios and evaluated motor performance under variable solar input conditions
- Assisted in electrical wiring, waterproofing, and system insulation to ensure safety and durability

TECHNICAL SKILLS

Manufacturing: CNC, Composites, 3D Printing, Production Layout
Process/Quality: DFM, Tolerance Analysis, SOPs, Capacity Analysis, First Article Inspection (FAIR)
CAD: SOLIDWORKS, Fusion 360, MasterCam | Programming: Python
